# TEMATICA

pentru Doctorat sesiunea iulie 2018, 1 loc cu taxă,
Ortopedie - Prof. Dr Dinu ANTONESCU

Boala degenerativa discala lombara:

- cauze,
- aspecte anatomo-patologice,
- consecinte morfologice asupra coloanei lombare
- consecinte funcționale asupra coloanei lombare
- posibilitati terapeutice conservatorii și chirurgicale
- este posibilă regenerarea discului lombar degenerat?

## BIBLIOGRAFIE :

Monografii - capitolul respectiv din cel putin 1 monografie

1. Irving M. Shapiro, Makarand V. Risbud – The Intervertebral Disc, Springer 2014
2. Dino Samartzis – Lumbar Intervertebral Disc Degeneration, An Issue of Orthopedic Clinics, Saunders 2012
3. Frank M. Philips, Carl Lauryssen – The Lumbar Intervertebral Disc, Thieme 2009
4. Juergen Kraemer – Intervertebral Disc Diseases, 3rd edition, Thieme 2008
5. Robert Gunzburg, Marek Szpalski, Gunnar B.J. Andersson – Degenerative Disk Disease, Lippincot Williams & Wilkins, 2003

Articole - cel puțin 6 - 8 din următoarele articole :

1. Surgical Anatomy of the Spine, Revisited
Rauschning, Wolfgang. Spine. 42:S1-S2, April 1st, 2017.
2. Clinical Biomechanics of the Spine
Sengupta, Dilip K. Spine. 42:S3, April 1st, 2017.

3. Adult Degenerative Spinal Deformity: Overview and Open Approaches for Treatment. Kretzer, Ryan M. Spine. 42:S16, April 1st, 2017.

4. Stem Cells and Discogenic Low Back Pain. Kim, Kee D. MD. Spine: April 2016 - Volume 41 - Issue - p S11–S12

**5.** Clinical Outcome in Lumbar Decompression Surgery for Spinal Canal Stenosis in Aged Population: A Prospective Swiss Multicenter Cohort Study. Ulrich, Nils H.; Kleinstück, Frank; Woernle, Christoph M.; et al. Spine. 40(6):415-422, March 15th, 2015.

6. Early Impact of Postoperative Bracing on Pain and Quality of Life After Posterior Instrumented Fusion for Lumbar Degenerative Conditions: A Randomized Trial. Soliman, Hany A.G.; Barchi, Soraya; Parent, Stefan; et al. Spine. 43(3):155-160, February 1, 2018

7. Age-Correlated Phenotypic Alterations in Cells Isolated From Human Degenerated Intervertebral Discs With Contained Hernias. Molinos, Maria; Cunha, Carla; Almeida, Catarina R.; et al. Spine. 43(5):E274-E284, March 1, 2018

8. In vivo biofunctional evaluation of hydrogels for disc regeneration. Sandra Reitmaier, Ludwika Kreja, Katharina Gruchenberg, Britta Kanter, Joana Silva-Correia, Joaquim Miguel Oliveira, Rui Luís Reis, Valeria Perugini, Matteo Santin, Anita Ignatius, Hans-Joachim Wilke. Eur Spine J. 2014 Jan; 23(1): 19–26.

9. Using notochordal cells of developmental origin to stimulate nucleus pulposus cells and bone marrow stromal cells for intervertebral disc regeneration. Esther Potier, Keita Ito. Eur Spine J. 2014 Mar; 23(3): 679–688.

10. Surgery versus conservative management in adult isthmic spondylolisthesis--a prospective randomized study: part 1. Möller H, Hedlund R. Spine (Phila Pa 1976) 2000; 25:1711-1715

11. Surgery versus conservative management in adult isthmic spondylolisthesis--a prospective randomized study: part 2. Möller H, Hedlund R. Spine (Phila Pa 1976) 2000; 25:1716-1721

12. Comparative prospective randomized study comparing conservative treatment and percutaneous disk decompression for treatment of intervertebral disk herniation. Erginousakis D, Filippiadis DK, Malagari A, et al. Radiology 2011;260:487

13. Comparison of surgical outcomes between macro discectomy and micro discectomy for lumbar disc herniation: a

prospective randomized study with surgery performed by the same spine surgeons. Katayama Y, Matsuyama Y, Yoshihara H et al. Spinal Disord Tech 2006; 19:344

14. Prolonged conservative care versus early surgery in patients with sciatica caused by lumbar dfisc herniation: two year results of a randomized controlled trial. Peul WC, van den Hout WB, Brand R, et al. BMJ 2008;336:1355

15. Comparative effectiveness evidence from the spine patient outcomes research trial: surgical versus nonoperative care for spinal stenosis, degenerative spondylolisthesis, and intervertebral disc herniation. Tosteson AN, Tosteson TD, Lurie JD, et al.Spine (Phila Pa 1976) 2011; 36:2061.

16. Five-Year Follow-Up of a Prospective, Randomized Trial Comparing Two Lumbar Total Disc Replacements. Guyer RD, Pettine K, Roh JS, et al. Spine (Phila Pa 1976) 2016; 41:3.

17. Lumbar Total Disc Replacement for Discogenic Low Back Pain: Two-year Outcomes of the activL Multicenter Randomized Controlled IDE Clinical Trial. Garcia R Jr, Yue JJ, Blumenthal S, et al. Spine (Phila Pa 1976) 2015; 40:1873

18. Total disc replacement compared to lumbar fusion: a randomised controlled trial with 2-year follow-up. Berg S, Tullberg T, Branth B, et al.Eur Spine J 2009; 18:1512.

19. Randomised controlled trial to compare surgical stabilisation of the lumbar spine with an intensive rehabilitation programme for patients with chronic low back pain: the MRC spine stabilisation trial. Fairbank J, Frost H, Wilson-MacDonald J, et al.BMJ 2005; 330:1233.

20. A Mouse Intervertebral Disc Degeneration Model by Surgically Induced Instability. Oichi, Takeshi; Taniguchi, Yuki; Soma, Kazuhito; **et al.** Spine. 43(10):E557-E564, May 15, 2018.

21. Efficacy of intervertebral disc regeneration with stem cells: a systematic review and meta-analysis of animal controlled studies. Wang Z, Perez-Terzic CM, Smith J, et al.. *Gene* 2015; 564:1–8.

22. Disc regeneration therapy using marrow mesenchymal cell transplantation. A report of two case studies. Yoshikawa T, Ueda Y, Miyazaki K, et al. *Spine (Phila Pa 1976)* 2010; 35:E475–E480.

23. Intervertebral disc repair by autologous mesenchymal bone marrow cells: a pilot study. Orozco L, Soler R, Morera C, et al. *Transplantation* 2011; 92:822–828.

24. Degenerative disc disease : genotyping, MR imaging and phenotyping, Michael T. Modic, Skeletal radiol 2007, 36, 91-93

25. Axial T1p MRI as a diagnostic imaging modality to quantify proteoglycan concentration in degenerative disc disease, K. Mulligan, R. Gawri, J. A. Ouellet : Eur Spine J 2015, 24, 2395-2401

26. Comparison of therapies in lumbar degenerative disc disease : a network meta-analysis of randomized controlled trials, J. Zigler, N. Ferko, C. Cameron, L. Patel : J. Comp. Eff.Res. 2018, 7(3), 233-246

27. Long-term follow-up of functional outcomes and radiographic changes at adjacent levels following lumbar spine fusion for degenerative disc disease, M. N. Kumar, F. Jacquot, H. Hall, Eur Spine J 2001, 10, 309-313

28. Comparison between posterior dynamic stabilisation and posterior lumbar interbody fusion in the treatment of degenerative disc disease, H. Fei, J. Xu, S. Wang, Y. Xu : Journal of Orthopaedic Surgery and research 2015, 10:87

29. Total disc replacement versus fusion for lumbar degenerative disc disease : a systematic review of overlapping meta-analyses, F. Ding, Z. Jia, Z. Zhao, M. Liu : Eur Spine J 2017, 26:806-815

30. Comparison of lumbar total disc replacement with surgical spinal fusion for the treatment of single-level degenerative disc disease : a meta-analysis of 5-year outcomes from randomized controlled trials, J. Zigler, M. F. Gornet, F. W. Schranck Global spine Journal, 2017, 1-11

31. The biological basis of degenerative disc disease: proteomic and biomechanical analysis of the canine intervertebral disc. W. Erwin, L. DeSouza, M. Funabashi, S. Kim, A. Matta, Arthritis Research & Therapy 2015, 17:240

32. Quantitative assessment of intervertebral disc glycosaminoglycan distribution by gadolinium – enhanced MRI in orthopedic patients, S. Vaga, M. T. Raimondi, E. Caiani, M. Fornari : Magnetic Resonance in Medicine, 2008, 59:85-95
